Q2)

A screenshot of an AWS CloudShell terminal session. The top bar shows the AWS logo, a search icon, the text "Search", a keyboard shortcut "[Alt+S]", and several utility icons (mail, notifications, help, settings). On the right side of the top bar, it says "Asia Pacific (Mumbai)" with a dropdown arrow, and below it, the user's name "SarimSiddiqui". The terminal itself has a black background with white text. It displays a tree-like diagram representing a file system or network structure, followed by the URL "https://aws.amazon.com/linux/amazon-linux-2023". Below this, it shows the last login information: "Last login: Sat Jun 13 05:15:16 2026 from 13.233.177.3". At the bottom, the command prompt "[ec2-user@ip-172-31-1-26 ~]\$" is shown, followed by the commands "docker volume create studentdata" and "studentdata.", which have been executed successfully.

Q3)

```
[ec2-user@ip-172-31-1-26 ~]$ vi Dockerfile1
[ec2-user@ip-172-31-1-26 ~]$ cat Dockerfile1

FROM ubuntu
CMD echo "Cloud Computing Practical Exam Completed Successfully"

[ec2-user@ip-172-31-1-26 ~]$
```
